BIG TIM PAYS DEBT FOR TEX RICKARD

If Forfeit Is Not Up by June 8. Sullivan Will Give Fighters Money.

By Associated Press.

NEW YORIS, April 16.—Senator "Big
Tim" Sulliyan's supposed passession of
\$20,000 in each which "Tox" Rickard put
up as a guarantee when bidding for the
deficier-Johnson light, lod to his appearance in the supreme court here today,
lie was subpoenned by a Dr. Conkley,
who wanted "Big Tim" to submil to an
examination as to whether he had that
much money belonging to Rickard.

According to the papers in the case,
Coaldey is anxious to collect a chaim of
\$2200 from Rickard and wanted to know
why it should not be paid out of this
money.

s2200 from Rickard and wanted to know why it should not be paid out of this money.

Justice Greenhaum remarked that if Sullivan didn't want to be examined he could pay the amount of the claim. This caused "Rig Tim" to smile broadly.

No definite action was announced.

After the conference it developed that the plaintiff in the action was Dr. Cornelius G. Coakley, a throat specialist and that, according to the documents in the case, he held a judgment against Rickard for the amount stated.

It appeared also that Sullivan had been ordered by the court to pay over the amount of the judgment from the money he had in his possession.

Senator Sullivan amounted his willingness to pay the amount and drew his check for \$2290, the amount of the judgment and interest and turned it over to the sheriff.

The senator intimated that he was not exactly satisfied with the situation as to the fight guarantee. While in court he declared that \$29,090 was still due to be deposited as the remainder of the forfeit money on the fight.

If it is not made good by June \$." said Sullivan, "I shall turn over the money see far deposited to Jeffrica and Johnson in equal parts."

DUCK HUNTER BECOMES A GREAT INVENTOR

Frank H. Rudy chaims that he has invented a trolley decoy duck that will do the business in the field. He has made a thorough test of his new invention and vonches for its access.

A thin wire is strong on steel poles, in a circle, and from this wire a canvass duck is suspended. The trolley wire runs up and down, much the same as a scenic railway, and Rudy says that when once the artificial duck is given a start it continues to run in a circle on the wire until stopped. The hunter's blind is placed in the center of the circle, about fifty feet from the wire. As the decoy duck circulates around the hunter, the flying ducks are attracted and swoop over the fattal allid where they are shot. Rudy says that when he was testing his invention soveral ducks flew aganist. The wire, cutting off their beads.

No Circuit Meet.
